Projects

Aura Infinity — Music Player (Front-end Concept)

- A clean and minimal music player UI that redirects users to curated YouTube playlists. Focuses on modern visuals, easy navigation, and a smooth listening experience.

NutriTrackPro — Nutrition Planner (Python Console App)

- A Python-based system that helps users track weight, manage fitness goals, and follow structured diet plans. Developed fully using basic Python logic without external UI frameworks.

SINISTER Merchandise Website — Digital Marketing Project

- A branding and promotional project showcasing merchandise marketing, ad creatives, customer engagement strategies, and digital funnels. Highlights skills in branding and social media marketing.

Internship Opportunity Recommender — DSA-Based Project

- A recommendation system built using **Data Structures & Algorithms**, designed to match students with suitable internship opportunities.
- Uses searching, sorting, ranking, and filtering techniques
- Analyzes student skills, project history, and interests
- Suggests best-fit internships with weighted scoring logic
  This project demonstrates practical application of DSA and algorithmic reasoning.
